

Yangming Zhang

Ph.D. Student, School of Information Management, Wuhan University

Cultural Heritage Intelligent Computing Lab / Wuhan, China

Google Scholar: scholar.google.com/citations?user=UUm2HEAAAAAJ / GitHub: github.com/JAdpp

Ph.D. student working on Human-AI collaboration, multimodal LLM agents, cultural intelligence, and AI for mental wellbeing. My work focuses on culturally situated human-AI collaboration in emotional support, education, and digital cultural heritage contexts, combining interactive system building, user studies, and mixed-methods evaluation.

Education

Wuhan University

2024-Present

Ph.D. Student, School of Information Management / Cultural Heritage Intelligent Computing Lab

Research interests: Human-AI collaboration, intelligent computing for digital cultural heritage, AI-native applications.

University College London

2022-2023

M.Sc. in Digital Humanities, Department of Information Studies

Distinction, Top 1; Dissertation Showcase; Faculty of Arts and Humanities Dean's List.

Wuhan University

2015-2019

B.Sc., School of Information Management

GPA 85/100; nominated for Excellent Undergraduate Thesis; Excellent Student Researcher.

Selected Projects

Poemithy / Classical Chinese Poetry Therapy (2024-Present)

Designed and evaluated a multimodal LLM-based interaction system for emotional support, exploring classical Chinese poetry as a culturally grounded medium. Related outputs include CHI EA 2026, UbiComp/ISWC Companion 2025, and ASIS&T; 2025.

MindTrace, Future Laboratory, Tsinghua University (2025)

Designed thought-visualization approaches for creative problem solving in a multi-agent educational system; contributed to system pipeline work, front-end/back-end prototyping, and evaluation planning.

BrickSmart, Future Laboratory, Tsinghua University (2024)

Worked on prompt strategies, multimodal model/API testing, Python/Django back-end development, deployment, and offline user-study support for a parent-child spatial language learning system.

dsh-whale-galgame (2026-Present)

Created and maintained an open-source multi-model visual novel plugin for DeepSeek Harness, with separate character and reply-model routing, persistent per-character state, bounded cross-session task cues, side stories, and a desktop companion.

Co-Created Travel Journal (2026-Present)

Developed an AI-assisted travel memory workspace that preserves user-confirmed wording and keeps photographs, captions, and generated visual elements independently editable and exportable.

Mengdie Ji (2026-Present)

Developed a culturally grounded interactive narrative experience that connects user-confirmed personal experiences with traceable classical Chinese stories while separating source material from contemporary adaptation.

Woyou (2026-Present)

Developed an evidence-grounded AI curator for source-traceable 3D and 2D virtual exhibitions using openly licensed museum collections and a controlled agent workflow.

V&A; Chinese Export Watercolours Digitization and Computational Analysis (2022-2023)

Worked with UCL and the UK's Victoria and Albert Museum (V&A;) on Chinese iconography data, open museum metadata, collection digitization, and computational analysis of Chinese export watercolours.

Technical and Research Skills

- LLM and agent systems: LangChain, Dify, Coze, prompt/context orchestration, multimodal API integration and testing.
- Programming and systems: Python, JavaScript, Django, SQL, HTML/CSS, Git, data processing, and cloud deployment.
- Research methods: Human-AI collaboration research, user studies, system evaluation, mixed-methods analysis, and digital humanities data analysis.
- Design and content production: Photoshop, Illustrator, InDesign, Premiere, digital painting, and AIGC-based visual workflows.

Honors and Awards

- First-Class Academic Excellence Scholarship, School of Information Management, Wuhan University, 2025.
- First-Class Guangdong Xinhua Elite Scholarship, School of Information Management, Wuhan University.
- Faculty of Arts and Humanities Dean's List, UCL; Distinction / Top 1 in M.Sc. Digital Humanities; Dissertation Showcase, 2023.

Additional Experience

- National Science Library, Chinese Academy of Sciences, Science Exhibition Curation and Implementation Intern, 2024.
- Digital Humanities Institute, Renmin University of China, Student Researcher, 2023-2024.
- Tsinghua University Library, Multimedia Resources Services Librarian, 2021-2022.
