

Yangming Zhang

Wuhan University | ICLCH | [Google Scholar](#) | [GitHub](#) | [Homepage](#)

Ph.D. student in the School of Information Management at Wuhan University and a student researcher at the Intelligent Computing Laboratory for Cultural Heritage (ICLCH). I study human-AI collaboration, culturally grounded multimodal LLM agents, AI for mental wellbeing and education, digital cultural heritage, and AI-native games.

EDUCATION

Wuhan University	2024-Present
Ph.D. student, School of Information Management / ICLCH. Research on human-AI collaboration, intelligent computing for digital cultural heritage, and AI-native applications.	
University College London (UCL)	2022-2023
M.Sc. Digital Humanities, Department of Information Studies. Distinction; Top 1; Dissertation Showcase; Faculty of Arts and Humanities Dean's List.	
Wuhan University	2015-2019
B.Sc., School of Information Management. GPA 85/100; nominated for Excellent Undergraduate Thesis; Excellent Student Researcher.	

RESEARCH EXPERIENCE

Department of Information Management, Peking University	Sep 2025-Jan 2026
Visiting student	
MindTrace, Future Laboratory, Tsinghua University	2025
Research intern Designed thought-visualization approaches for creative problem solving in a multi-agent educational system; contributed to system prototyping and evaluation planning.	
V&A Chinese Export Watercolours Digitization and Computational Analysis	2022-2023
Research assistant / project researcher Worked with the Victoria and Albert Museum collection: transcribed 5,000+ corpus records, prepared 300 metadata records, digitized 3,000+ paintings, and supported computational classification into 22 thematic categories.	
Generative AI for Digital Content Curation in Cultural Heritage	2023
M.Sc. dissertation, UCL Built a prototype combining GPT-3.5 and DALL-E 2 for virtual-exhibition curation and developed a mixed evaluation framework for generated cultural-heritage content.	
BrickSmart, Future Laboratory, Tsinghua University	2024
Research intern Supported prompt design, multimodal model testing, Python/Django development, deployment, and user-study preparation for a family block-play learning system.	
Digital Humanities Institute, Renmin University of China	2023-2024
Student researcher Produced digital-humanities review reports and helped plan and organize an academic salon on AI agents.	
National Science Library, Chinese Academy of Sciences	2024
Science exhibition curation and implementation intern Developed a Coze-based agent workflow for science communication, curated 60 CAS WeChat posts, and contributed to a strategic proposal for the 15th Five-Year Plan.	

SKILLS

Programming and systems: Python, JavaScript, PHP, Django, LangChain, Dify, multimodal LLM application development, HTML/CSS, Git.
Methods: human-AI collaboration research, user studies, mixed-methods evaluation, digital humanities data analysis. Languages: Chinese (native), English (fluent).

SELECTED PROJECTS

Poemithy / Classical Chinese Poetry Therapy link Independent / collaborative project A multimodal LLM interaction system that connects poetic interpretation, dialogue, and visual expression for culturally grounded emotional support.	2024-Present
dsh-whale-galgame link Independent / collaborative project An open-source multi-model visual-novel plugin for DeepSeek Harness, with character-aware routing, persistent state, and interactive story extensions.	2026-Present
Co-Created Travel Journal (Trip Canvas) link Independent / collaborative project An open-source agent skill for turning travel materials into editable visual journals, object manifests, layout plans, and mini-comics.	2026-Present
Mengdie Ji link Independent / collaborative project A culturally grounded interactive narrative project exploring dream, memory, and classical literary motifs through agent-assisted storytelling.	2026-Present
Woyou link Independent / collaborative project An AI-assisted cultural-heritage curation project for organizing, interpreting, and presenting digital materials as exploratory exhibits.	2026-Present

ADDITIONAL EXPERIENCE

Tsinghua University Library Multimedia Resources Services Librarian Created metadata for vinyl records and multimedia resources, and supported reading promotion, video production, and user surveys.	2021-2022
Research on Chinese Academic Integrity Policy Data Research intern Collected academic norms and morality policies from 100+ institutions and contributed to a preliminary research dataset.	2017
Application of Virtual Reality in Chinese Public Libraries Team leader Led a four-student field-research team, conducted 500+ questionnaires and expert interviews, and produced a 20,000-word report with recommendations.	2016-2017
Wuhan Library, Chinese Academy of Sciences Intern leader Transcribed 500+ records and organized 10,000+ government-information records using Excel/VBA and improved label-code accuracy.	2018

HONORS AND AWARDS

- First-Class Academic Excellence Scholarship, School of Information Management, Wuhan University, 2025.
- First-Class Guangdong Xinhua Elite Scholarship, Wuhan University.
- UCL Faculty of Arts and Humanities Dean's List; Distinction / Top 1 in M.Sc. Digital Humanities; Dissertation Showcase, 2023.
- Merit Award, Global Digital Intelligence Education Innovation Competition; CDH2024 AIGC Excellent Project Award, for Poemithy.
- Excellent Graduation Thesis Nomination, Wuhan University, 2019; Excellent Practical Student Researcher, 2016.
